Biology and Fertility of Soils

Founded in 1985
by J. C. G. Ottow

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-0727, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for a copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A 0S2, Canada (Tel: 6 13-9 93-92 51; Fax: 6 13-9 52-82 43; e-mail: cisti.docdel@nrc.ca).

Technical instructions for manuscripts submitted on diskette

Submission of a paper on diskette can mean a considerably shorter publication period, but only if a few basic rules are observed in preparing the text file. Otherwise it could be more economical to typeset conventionally using the hard copy.

Note: Authors wishing to submit diskettes are requested to wait until the review process has been completed.

Important: Please send us only the *final updated version* on your diskette.

- Please follow the *Instructions to authors* for the appropriate journal when structuring the subject matter of your paper.
- Please submit your text on diskettes formatted for DOS or Macintosh systems.
- If possible, please store your text in two versions:

  1. In the standard data file format offered by your word processing system;
  2. In one of the data interchange formats listed below. Many word processing systems offer the option of using another file format when a text is saved or stored.

  The formats, listed here in declining order of preference, are:
  - RTF (Microsoft Rich Text Format)
  - DCA/RFT (Document Containment Architecture/ Revisable Form Text)
  - DCA/FFT (Document Containment Architecture/Final Form Text)
  - ASCII or "text only"
- Make sure your diskette is adequately packed when preparing it for dispatch.
- The text file and the printout *must correspond* exactly. Any deviations may delay processing, involve high correction costs and make it uneconomical to use the diskette.
- It is not necessary to incorporate any special page layout in your text.
- Input your text continuously; in other words, only insert *hard returns* (↵) at the ends of paragraphs or headings, subheadings, lists etc.
- Do not use the space bar to make *indents* (e.g. to indicate paragraphs or in lists). A tabulator or an indent command should be used for this purpose.
- Please use the automatic pagination function incorporated in your word processing system, i.e. do not insert page numbers manually.
- Any words or phrases in the text that you wish to *emphasize* should be indicated throughout the paper in italic script or, if this is not available, by underlining.

  Boldface type should normally only be used in the running text for certain mathematical symbols, e.g. vectors.
- *Hyphen/dash coding*

Hyphen	`high-resolution`
En-dash	`1990--1992, Diabetologia 25: 345--352`
Em-dash	`Bacteria -- often in high numbers -- were found`
Minus sign	`at a temperature of --75°C`

- Please place all tables at the end of your file. Always separate the individual columns using tabulators, not using the space bar.
- Please delete any annotations or comments from the final text file.

Acta Agriculturæ Scandinavica
Section B. Soil and Plant Science

Scientific Editor: Ulf Wünsche, Sweden

Acta Agriculturae Scandinavica presents original research in soil and plant science and their applications related to soil and fertilizers such as:

✧ land preparations ✧ drainage and watermanagement ✧ applied plantphysiology
✧ general agronomy ✧ environmental considerations ✧ plant breeding and genetics
✧ quality assessment ✧ harvesting and processing ✧ quality aspects of crop products
✧ crop production science, including horticulture ✧ plant protection, including plant pathology and entomology ✧ economic and technical aspects of soil and plant management

Acta Agriculturae Scandinavica is published jointly by The Scandinavian Association of Agricultural Scientists (NJF) and the Royal Swedish Academy of Agriculture and Forestry (KSLA).

Acta Agriculturae Scandinavica is published quarterly by Scandinavian University Press.

Acta Agriculturae Scandinavica is indexed in among others; AGRINDEX; Current Contents; Excerpta Medica EMBASE; Science Citation Index; SCISEARCH.

SCANDINAVIAN UNIVERSITY PRESS
Oslo - Copenhagen - Stockholm - Boston

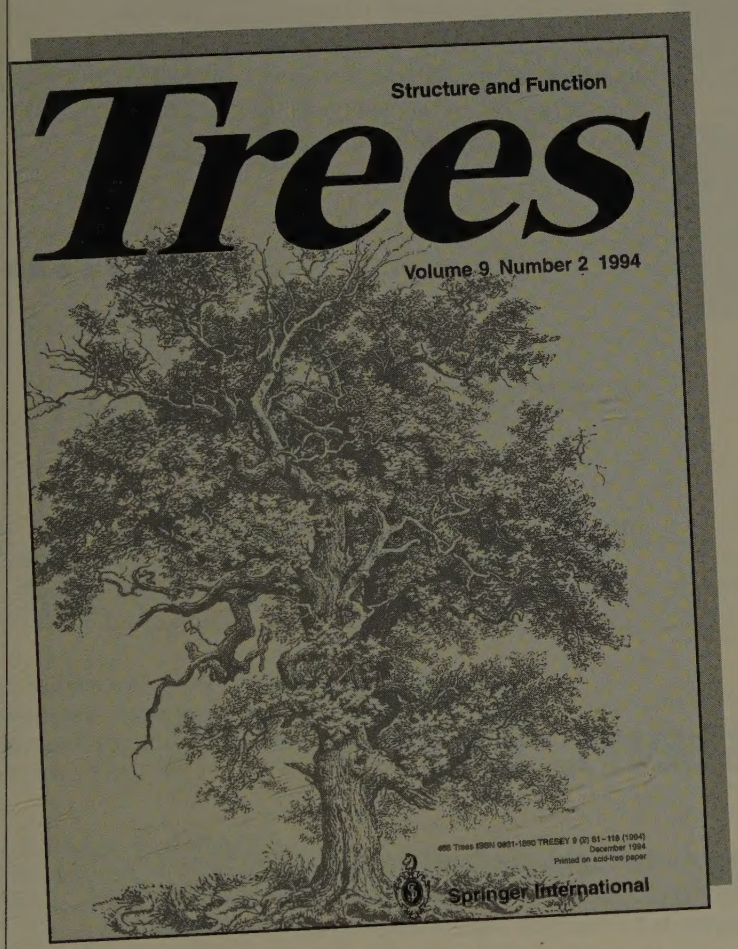
Springer leaves no doubt



Trees, Structure and Function
features original articles treating aspects of plant biology, particularly in

- physiology
- biochemistry
- functional anatomy
- structure and ecology of trees and other woody plants.

Papers concerned with pathology and technological problems, when they contribute to the basic understanding of structure and function of trees, are also included.

In addition to original articles, the journal publishes reviews on selected topics concerning the structure and function of trees.

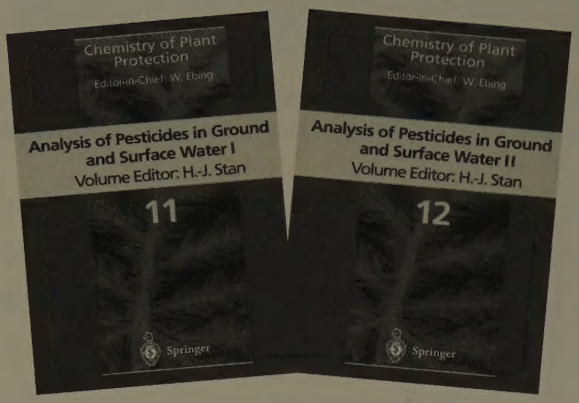
Residual information



Pesticides and their residues in ground and surface water are and will remain of great public concern. Part I and II of this book discuss all aspects of modern analysis of pesticides in water, emphasizing the consequent use of hyphenated techniques like GC-AED or HPLC-MS.

Progress in Basic Multi-Residue Methods
1995. XII, 267 pages.
166 figures, 44 tables.
Hardcover DM 228,–
ISBN 3-540-58794-2

Latest Developments and State-of-the-Art
1995. XII,226 pages.
99 figures, 28 tables.
Hardcover DM 228,–
ISBN 3-540-59053-6

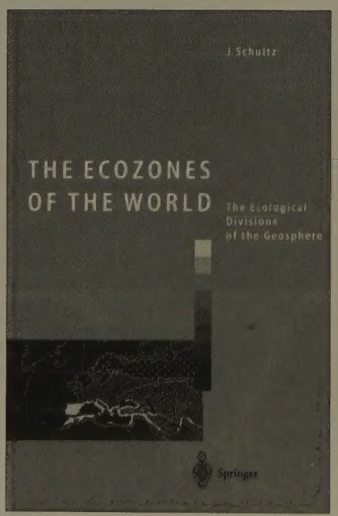
The ecosystem, Earth



Recent studies have greatly contributed to a better understanding of the ecosystem Earth. This abundantly illustrated book provides a fundamental introduction to the ecological zones of the geosphere. Nine terrestrial ecozones have been distinguished and described in individual chapters with respect to: distribution, climate, relief/hydrology, soil vegetation/animal life and land use.

J. Schultz
The Ecozones of the World
The Ecological Divisions of the Geosphere
1995. X, 449 pages. 189 figures, 48 tables.
Hardcover DM 128,–
ISBN 3-540-58293-2
